

Module Overview

Overview:

In this module, we will explore the critical dimensions of literacy in the digital age, encompassing digital literacy, media literacy, art literacy, and AI literacy. Through a blend of theory, case studies, and practical activities, students will examine the roles these literacies play in education, activism, and social justice. Special focus will be placed on how we, as educators, can integrate these literacies to expose students power and agency, disrupt societal inequalities, and foster critical thinking. From understanding digital citizenship to analyzing the intersection of AI and educational practices, this module also delves into art literacy, exploring the ways visual arts and digital tools can be used to engage students in discussions about representation, culture, and societal issues. By the end of the module, we will have collectively developed strategies to promote responsible digital engagement, critical consumption of media, and creative expression through art and technology

Module Objectives:

Explore Digital Citizenship and Literacy Practices: We will investigate key themes in digital literacy, focusing on how digital tools can reveal students power and agency to navigate and critically engage with the online world.

Integrate Art Literacy into Digital Spaces: We will analyze how visual arts can be used to springboard discussions on societal issues, bridging digital literacy with creative expression and critical thinking.

Design Inclusive Digital & Art Literacy Lessons: We will develop lesson plans that blend digital literacy and art literacy to foster student engagement with both visual and digital media, emphasizing ethical and inclusive practices.

Study the Role of Digital Activism and Media Literacy: We will examine how digital spaces and media are used for activism, focusing on how youth and marginalized communities leverage digital tools to challenge societal inequities

Analyze AI Literacy in Education: We will explore how AI technologies are transforming education, identifying both the opportunities and challenges they present for teachers and learners, and developing strategies for incorporating AI literacy into their teaching practices.

Design Critical AI & Media Literacy Initiatives: We will create initiatives that integrate AI literacy and media literacy, aiming to foster critical engagement with AI technologies and challenge biased narratives in digital and media spaces.

Assignments (refer to checklist tool to check off each item as you complete it):

- Read all readings & engage with all Digital Resources (organized by week in readings tab)
- Engage in Synchronous Zoom Class week 5
- Harmonize Discussion Digital & Media Literacy
- Engage in Synchronous Zoom Class week 6

- Harmonize Discussion AI Literacy
- Submit Joy Oriented Literacy Pursuit
