

A background image showing a close-up of a woman's face, likely a teacher, looking towards the right with a focused expression. The background is blurred, showing other people in a classroom setting.

Harnessing the power of
teaching to create a
more just society.

At TeachingWorks, we work with teacher educators, teachers, and leaders to create transformative learning experiences for every student. Find out how our powerful professional learning and research-grounded tools and materials can impact your work.

Programs + Services

For Teacher Education

For PK–12

HIGH-LEVERAGE PRACTICES

High-leverage practices are the fundamental tasks of equitable classroom teaching, used across subject areas, grade levels, and contexts.

[Visit Resources →](#)

OUR FOCUS

Our work is grounded in the intersection of equity, practice, and content, empowering

educators to develop equitable, skillful teaching.

[Explore Our Services →](#)

WHOM WE SERVE

Learning to teach is an ongoing journey so we design programs and services to support teaching across the career span, from teacher preparation to PK–12 teaching.

PK–12

- **District & Instructional Leaders** support new and veteran teachers in building effective, high-leverage teaching practices through tailored professional development.
- **Teachers** develop their practice through expertly led learning experiences grounded in the realities of actual classrooms.

Learn about our PK–12 Programs & Services

Teacher Education

- **Teacher Preparation Leaders** support preservice teachers to develop equitable teaching using standards, guidelines, frameworks, and programs.
- **Teacher Educators** help preservice teachers by equipping them to create justice-centered classrooms from day one.

Learn about our Teacher Education Programs & Services

OUR WHY

Teaching consists of countless individual interactions with students.

We believe that these interactions matter. That's why we've dedicated ourselves to investigating, understanding, and refining teaching practice, down to the smallest details. This is what it takes to drive transformative changes in the classroom.

UPCOMING EVENTS

Elementary Mathematics Laboratory

July 6–10, 2026

This week-long learning opportunity will use live elementary mathematics instruction to explore the complexity of teaching and investigate and challenge what it means to use skillful teaching to disrupt patterns of injustice.

[Learn more about the EML →](#)

Backwards Design Institute for Teacher Educators

July 30–31, 2026

If you are responsible for designing a course inside a teacher education program—or even an entire program—you should join us for the Backwards Design Institute for Teacher Educators. In this focused, one-and-a-half-day event, we will apply the tenets of backwards design to teacher education to explore how teacher educators can develop a clear, shared vision of what teacher candidates will learn to do in their programs and how to use that vision to shape their courses.

TeachingWorks Practice Collaborative: Analyzing Practice Through Videos and Transcripts

September 18, October 16, and November 13, 2026

Are you planning to use videos and transcripts in the coming semester to help your teacher candidates analyze teaching practice? Are you looking for some support? Join the TeachingWorks Practice Collaborative: Analyzing Practice Through Videos and Transcripts, a one-semester-long, virtual community of practice.

Learn more about the Video Practice Collaborative →

TeachingWorks Practice Collaborative: Rehearsals and Other Simulations

September 25, October 23, and November 20, 2026

Are you planning to implement rehearsals or another form of simulation in your upcoming class and looking for some support? Join the TeachingWorks Practice Collaborative: Rehearsals and Other Simulations, a one-semester-long, virtual community of practice.

FEATURED RESOURCES

High-Leverage Practices

Ensure your teacher candidates are skilled with the fundamental tasks of teaching across contexts.

High-leverage practices help:

- Students learn important content and support their social and emotional development
- Educators identify, understand, and begin to disrupt inequitable patterns across subject areas, grade levels, and contexts

[Explore the High-Leverage Practices](#)

Teacher Education Pedagogies

Explore pedagogies that teacher educators can use to provide preservice and current teachers with diverse examples of what teaching practice looks like in action.

Access resources that support the implementation of the high-leverage practices, including:

- Videos in classrooms
- Practice transcripts & simulated student interactions
- Peer run-throughs
- Coached rehearsals

Explore the Teacher Education Pedagogies

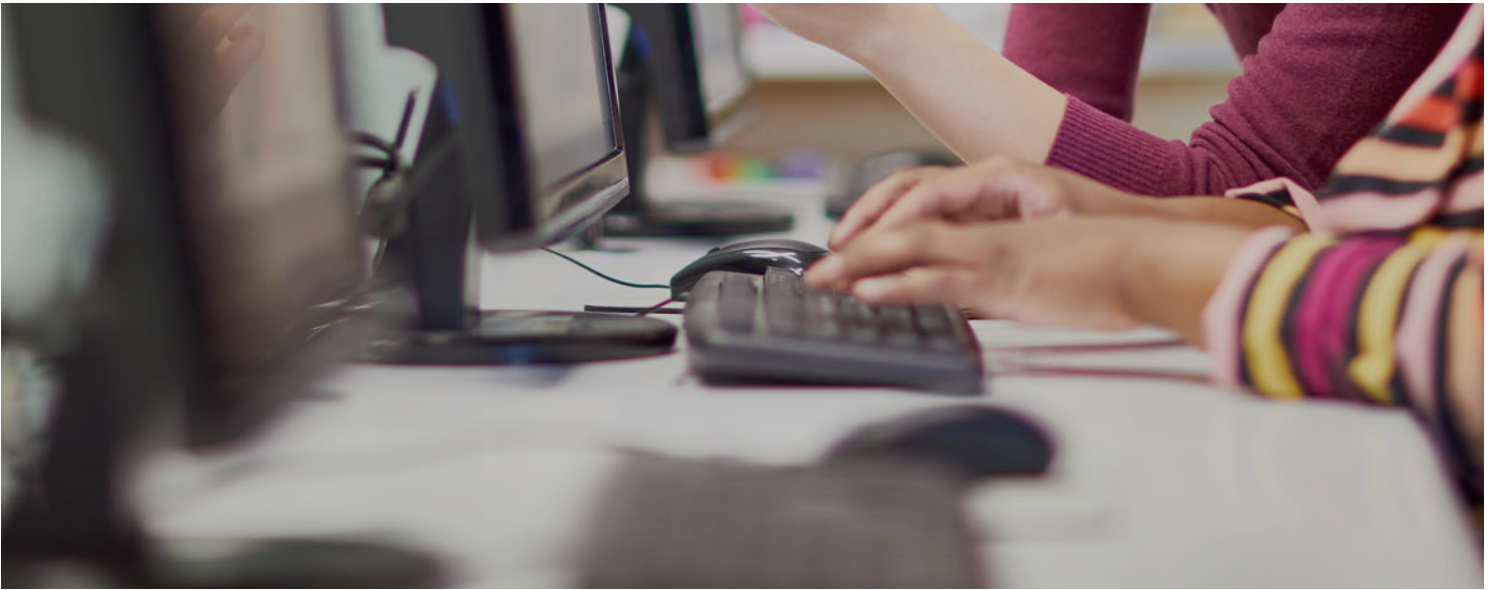

PK–12 Content

Learn how to connect the high-leverage practices and the teacher education pedagogies to specific PK–12 content areas including:

- General best practices
- Mathematics
- Science
- Social Studies
- English Language Arts

Visit the Resource Library

“TeachingWorks excels in their practice-based education approach. They emphasize learning, deconstructing teaching practices, and making equity.”
